CONTENTS

Volume 5, Issue Nos. 1-4

Issue Number 1

EARLY MATERNAL HANDLING AND PRESCHOOL BEHAVIOR OF HUMAN CHILDREN.....	<i>Lawrence V. Harper</i>	1
RESPONSIVENESS TO SIMPLE AND COMPLEX AUDITORY STIMULI IN THE HUMAN NEWBORN.....	<i>Gerald Turkewitz, Herbert G. Birch, and Kenneth K. Cooper</i>	7
THE TRANSITION FROM FILIAL TO REPRODUCTIVE FUNCTION OF "COITUS-RELATED" RESPONSES IN YOUNG GUINEA PIGS...	<i>Lawrence V. Harper</i>	21
BEHAVIORAL EFFECTS OF NEONATAL IRRADIATION OF THE CEREBELLUM. III. QUALITATIVE OBSERVATIONS IN AGED RATS.....	<i>Robert B. Wallace, Craig E. Daniels, and Joseph Altman</i>	35
DIFFERENCES IN THE MOTHER-INFANT RELATIONS OF SQUIRREL MONKEYS HOUSED IN SOCIAL AND RESTRICTED ENVIRONMENTS.....	<i>Joel Kaplan</i>	43
SOCIAL PREFERENCES OF MOTHER AND INFANT SQUIRREL MONKEYS FOLLOWING DIFFERENT REARING EXPERIENCES.....	<i>Joel Kaplan and Ronald J. Schusterman</i>	53
MOTHER-INFANT INTERACTIONS: EFFECTS OF EARLY HANDLING OF OFFSPRING ON RAT MOTHERS' OPEN-FIELD BEHAVIOR.....	<i>Gerald A. Hudgens, John D. Chilgren, and Deborah D. Palardy</i>	61
AN EXPERIMENTAL INVESTIGATION OF THE POSSIBLE ROLE OF TACTILE AND PROPRIOCEPTIVE STIMULATION IN CERTAIN ASPECTS OF EMBRYONIC BEHAVIOR IN THE CHICK.....	<i>Ronald W. Oppenheim</i>	71
ERRATUM.....		93
PUBLISHER'S NOTE.....		95

Issue Number 2

EDITORIAL: HUMAN HEARING: DEVELOPMENT'S UNDEVELOPED TERRITORY.....	<i>Rita B. Eisenberg</i>	97
STRAIN, SEX, AND ENVIRONMENT EFFECTS ON APPETITIVELY AND AVERSIVELY MOTIVATED LEARNING TASKS.....	<i>Betty Jo Freeman and Oakley S. Ray</i>	101
THE INFLUENCE OF NUTRITION ON NEURAL AND BEHAVIORAL DEVELOPMENT. IV. EFFECTS OF INFANTILE UNDERNUTRITION ON THE GROWTH OF THE CEREBELLUM.....	<i>Joseph Altman and Barbara McCrady</i>	111
DIFFERENCE IN MATERIAL RESPONSIVENESS BETWEEN LACTATING AND SENSITIZED RATS.....	<i>Robert Bridges, M. X. Zarrow, Ronald Gandelman, and Victor H. Denenberg</i>	123

iv CONTENTS

VULNERABILITY OF DEVELOPING BRAIN: IV. PASSIVE AVOIDANCE BEHAVIOR IN YOUNG RATS FOLLOWING MATERNAL UNDERNUTRITION.....	<i>J. L. Smart and John Dobbing</i>	129
BEHAVIORAL AND NEUROENDOCRINE EFFECTS IN RATS OF POSTNATAL EXPOSURE TO LOW DIETARY LEVELS OF MANEB... ..	<i>Thomas J. Sobotka, Robert E. Brodie, and Michelle P. Cook</i>	137
AROUSAL DEFECT IN L-PHENYLALANINE FED RATS.....	<i>Kjell Hole</i>	149
BEHAVIOR AND BRAIN GROWTH IN RATS TREATED WITH P-CHLOROPHENYLALANINE IN THE FIRST WEEKS OF LIFE.....	<i>Kjell Hole</i>	157
REDUCED ACTIVITY IN RATS WITH INDUCED PHENYLKETONURIA.....	<i>C. V. Vorhees, R. E. Butcher, and H. K. Berry</i>	175
VISUAL DISCRIMINATION LEARNING OF THE YOUNG CHICK: KEY-PECK CONDITIONING WITH HEAT-LIGHT REINFORCEMENT.....	<i>James F. Zolman, Sharon D. Chandler, and Diane Black</i>	181
INFORMATION FOR CONTRIBUTORS ON REFERENCES.....		189

Issue Number 3

EDITORIAL: THE NATURE-NUTURE RESOLUTION: WHAT DO WE DO WITH IT?.....	<i>Jack R. Vale</i>	193
REINFORCEMENT VALUE OF ELECTRICAL BRAIN STIMULATION IN NEONATAL DOGS.....	<i>W. Edward Bacon and Ira G. Wong</i>	195
EFFECTS OF DIFFERENTIAL PREWEANING SOCIAL ISOLATION ON EMOTIONAL REACTIVITY AND STRESS TOLERANCE IN THE RAT.....	<i>Robert J. Lorenz</i>	201
EFFECTS OF PRENATAL MATERNAL HANDLING AND REARING WITH AUNTS ON BEHAVIOR, BRAIN WEIGHT, AND WHOLE-BRAIN SEROTONIN LEVELS.....	<i>S. Michael Plaut, Charles W. Graham, III, and Katharine Y. Leiner</i>	215
LATENCY OF EEG ATTENUATION ("BLOCKING") IN RELATION TO AGE AND REACTION TIME IN NORMAL CHILDREN... ..	<i>Walter W. Surwillo</i>	223
THE EFFECTS OF PREWEANING HANDLING AND POSTWEANING HOUSING ON BEHAVIOR AND RESISTANCE TO DEPRIVATION INDUCED STRESS IN THE RAT.....	<i>Gerald J. Schaefer and Alex Darbes</i>	231
POPULATION DENSITY AND FOOD DISPERSION ON THE DEVELOPMENT OF PRISM-INDUCED AFTEREFFECTS IN NEWLY HATCHED CHICKS.....	<i>Patrick J. Rossi</i>	239
DEVELOPMENT OF ADULT-LIKE OPEN-FIELD BEHAVIORS IN YOUNG RETINAL-DEGENERATE C3H MICE.....	<i>Z. Michael Nagy and Christine S. McKay</i>	249
DEVELOPMENT OF 24 HOUR RETENTION OF ESCAPE LEARNING IN NEONATAL C3H MICE.....	<i>Z. Michael Nagy, James R. Misanin, and Peter L. Olsen</i>	259
PRENATAL EXPOSURE TO AN E L F-ROTATING MAGNETIC FIELD AND SUBSEQUENT INCREASE IN CONDITIONED SUPPRESSION.....	<i>Michael A. Persinger and Joseph J. Pear</i>	269

ADVANCES IN PSYCHOBIOLOGY

Volume One
Edited by Grant Newton,
Consultant, and
Austin H. Riesen,
*University of
California, Riverside*

Here is an overview of current research on biobehavioral development emphasizing theoretical issues and general implications. Fully documented by empirical data, the articles examine behavior in terms of growth, development, and longevity of the organism. Among the topics covered are musculoskeletal activity and the rate of entropy in mammals, first conditioned reflexes and the beginning of the learning process in human infants, adult versus infant brain damage, and psychobiological mechanisms in language development.

1972 304 pages 91 illus. \$16.50

PHYSICS FOR BIOLOGY AND MEDICINE

By I. W. Richardson and Ejler B. Neergaard,
both of the University of Aarhus, Denmark

This volume discusses physics as it applies to medicine and to the analytical study of biological phenomena. Emphasizing the role of underlying principles and their application to model building and problem solving, it demonstrates that the physics relevant to biology can be derived from a few basic concepts—i.e. dimension, mass, force, and energy—and from the application of simple statements of conservation and balance. Among the special features are an exceptionally lucid chapter on the transport of molecules across cell membranes, and numerous exercises specifically designed to extend the text.

1972 243 pages \$14.95

PATHOGENESIS OF THE AVIAN EMBRYO

An Analysis of Causes of Malformations and Prenatal Death
By Alexis L. Romanoff,
Cornell University
With the collaboration
of Anastasia J. Romanoff

Here is a detailed study of the effects of various deleterious agents on the incidence of specific syndromes and of prenatal mortality in the embryo. Dealing primarily with congenital defects induced experimentally in avian embryos, it covers such areas as spontaneous malformations, genetic mutations, pathogenic afflictions, and aberrant twinning. By consolidating the widely scattered scientific findings on teratological manifestations in the avian embryo, it provides insight into the causes, diagnosis, and prevention of congenital anomalies and prenatal death.

1972 464 pages 192 illus. \$22.50

BIOCHEMISTRY OF THE AVIAN EMBRYO

A Quantitative Analysis of Prenatal Development

By Alexis L. Romanoff
With the collaboration of Anastasia J. Romanoff

"... a valuable book which every embryologist, once he has seen it, will wish to have for frequent reference. . . ."

—*Nature*

"... a valuable reference work and should be on the shelf of anyone working on or interested in the biochemistry of the avian embryo."

—*BioScience*

1967 398 pages 113 illus. \$22.50

Information for Contributors

DEVELOPMENTAL PSYCHOBIOLOGY will promptly publish papers dealing with physiological, behavioral, or genetic studies of the developing organism. These may include research reports, theoretical treatises, notes on apparatus or methodology, and monograph supplements. In addition, the Journal will carry letters to the editors, announcements of general interest to our readers, and book notices.

Materials should be sent directly to the Editor-in-Chief, Dr. Gilbert W. Meier, Nebraska Psychiatric Institute, University of Nebraska College of Medicine, 602 South 45th Street, Omaha, Nebraska 68106, U.S.A., or your nearest Regional Editor. Publication is anticipated in six months or less after acceptance. Papers must not be submitted simultaneously to, or have been previously published in another journal except as an abstract or brief, preliminary report.

Authors should follow a clear, concise style. Articles should be typewritten on one side of 8½ x 11 inch (22 x 28 cm) paper of good quality, double-spaced throughout, have a wide margin all around, and be submitted in three copies (ribbon plus first two carbon copies) complete with tables and illustrations. All pages should be numbered serially beginning with the title page.

Research reports should be subdivided into the following sections: *Synopsis* (no heading required), *Introduction* (no heading required), *Method*, *Results*, *Discussion*, *Notes* (if applicable), *References*.

Language: English will be the language of publication.

Title: The title should be typed on page 1 of the manuscript together with author(s); laboratory or department and institution of origin; city, state, country; complete address for receiving proofs and reprint requests. Names of authors should be positioned vertically and grouped to avoid repeating an affiliation. If desired, additional affiliations or present addresses of authors may be stated in the *Notes* section. A short, running title of not more than 50 characters (including spaces) suitable for alternate page headings should be typed on page 2 of the manuscript, if the full title exceeds this limitation.

Synopsis: The synopsis should adequately summarize the paper in no more than 150 words and be typed on page 3 with a list of up to 12 words or phrases suitable for indexing purposes.

Notes: This section will include all material that otherwise would appear as footnotes, with the exception of the date the manuscript is received at the editorial office and table footnotes. *Notes* should be typed

on a separate page following the *Discussion* section. If they relate to the title or the authors, *Notes* should not have superscripts. Text footnotes should be numbered consecutively throughout the paper with superscripts in Arabic numerals. Table footnotes should be lettered consecutively within each table with superscripts in lower case Roman.

References: Authors cited in the text should be indicated by family name followed by year of publication (e.g., Hilton, 1967). When a reference has more than two authors, all the names should be used in the first citation, and on subsequent citation thus: (Hilton *et al.*, 1967). Where more than one paper by the same author(s) have appeared in one year, the convention will be: (Hilton, 1967a,b). Journal title abbreviations listed in *Index Medicus* should be used.

Form for journal reference: Alexander, G. J., Miles, B. E., Gold, G. M., and Alexander, Rita B. (1967). LSD: Injection early in pregnancy produces abnormalities in offspring of rats. *Science*, 157:459-460.

Form for chapter reference: Meier, G. W. (1968). In search of the engram: In the nursery. In G. Newton and S. Levine (Eds.), *Early Experience and Behavior*. Springfield: Thomas. Pp. 338-364.

Units of Measurement and Symbols: Examples: 5 µg 2 g 9 ml 8% ¹²⁵I. Units of measurement are abbreviated and unpunctuated when used with numerals.

Illustrations: These should be identified on the back lightly in pencil with number and author's name, indicating "top." Prints of figures should be sharp, clear, and glossy. Half-tones should be glossy, strongly contrasted prints. Captions should be typed on a separate sheet at the end of the manuscript. Indicate approximate point of insertion in the text.

Magnification of photomicrographs should be stated together with dimensional scale.

Tables: Each table should be typed on a separate sheet, indicating approximate point of insertion in the text.

Proofs: Printer's errors should be indicated marginally on the proofs. Other changes on the proofs may be charged to the author.

Reprints: The author will receive with his galley proofs a reprint order form which must be completed and returned with the proofs. Senior authors will receive 50 reprints of their articles without charge.
